RARE AMERICAN AND FOREIGN COINS.

From the cabinet of a well-known Collector.

COIN buyers are often surprised to see in their priced catalogues rare coins—catalogued with all the adjective modifications necessary to create in the mind of the collector an impression of superiority of condition—bring, when actually sold, indifferent, if not low prices. This may at times be due to a scarcity of appreciative buyers, but more frequently perhaps to the fact that the coins were described in their “to be wished for” rather than “actual” condition. Experienced professional buyers generally reject such coins, or cancel their orders, and consequently the prices realized agree rather with the “actual” than the “imagined” condition, much to the astonishment of the distant buyer, who jumps at the conclusion that the bottom has fallen out of the coin market, because a “very fine, chocolate color” *Améri* cent of 1793 sold for \$3.25, or a dime of 1796, “hair slightly rubbed,” only yielded \$1.25. In justice to the owner of this small lot of fine and mostly rare coins, I desire to state that in the following, as in all my descriptions, I have endeavored, honestly I know, and successfully I hope, to represent the coins in their exact and positive condition, without the least amplifications or imaginative embellishments whatsoever:—

- 1100 1096 U. S. HALF DOLLARS. 1794. Point of second star pierces lower curl. Perfectly centered, fine even milling, weak only from top of Y in LIBERTY to border.
